I urge you to reject NAB's petition 04 - 160 that would, as I understand it, stop XM radio from providing instant Traffic and Weather to its' PAYING customers. I enjoy the opportunity to ride in my car and be entertained AND find out valuable information when I need itNOT when it is deemed appropriate by a radio station that provides countless commercials and unnecessary talk. I PAY for this service and find it unbelievable that the National Association of Broadcasters finds it necessary to take this away from me. Traffic information in the Washington, D.C. area is VITAL information and waiting for it at "7 on the 7" or whenever it used to be available to me is simple ludicrous if there is a better way. THERE IS a better way.....XM RADIO. Please do not interfere or interrupt the service that they provide. THANK YOU!
a VERY happy XM listener
